Mr. Stewart:

As agreed in our last meeting here in San Juan, I am confirming EQB's commitment to this project and we want to assure you that the USDOJ will receive full cooperation from us in monitoring air quality at the five (5) sites selected for three (3) years required by 40 CFR Part 50. The five (5) monitoring stations will be located at Cataño (2), Salinas, Guayanilla, and Guayama.

The EQB is willing to accept the appointment as Court Monitor by the United States District Court for Puerto Rico to ensure the attainment and analysis of air samples gathered at the monitoring stations. We suggest as an alternative that the USDOJ and the EQB sign a Memorandum of Understanding for the project. The Court will transfer the funds necessary to operate the stations to the EQB, these funds will be used solely for the purpose of this project.

It is also understood that ownership of the equipment purchased for this project will be transferred to the EQB at the end of the three (3) year term. At this time, the EQB will be able to use the equipment for any activity it deems necessary, and its use will not be restricted in any way by any of the parties involved in the Court proceeding.

Please advise us of any court appearance in order to make the necessary arrangements for our personnel. Mr. Esteban Mujica, Chairman of the Board, will be in Washington from the 25th to the 27th of October, in case you wish to meet with him. If you require additional information, or if the EQB can be of any assistance please fell free to call me at (787) 767-8074 or (787) 767-8115.

Cordially,

Melvin Sotomayor-Rivera, Esq.
